Dearest Dr Cashia,

About 4 years ago, my feet started to give me a little bit of pain. Of course, it does not help to have a job working in retail standing for 8-10 hours a day, but I just dealt with it. Then last year my feet really started to hurt, tingle and felt numb and I would come home everyday, soak them in hot water, and put them up, only to start the whole process over again on a daily basis.

One morning, I got out of bed and fell flat on the floor because I could not feel my feet at all! Well at that point, I figured I should see a doctor, so through a referral of a happy patient of yours Doctor I made an appointment to see you. At that time, you told me you could help me and we could do one foot at a time. My right foot first is in tiptop condition and feels great after the surgery you performed. My left foot is in the process of healing and I am on my way to being able to work again without pain. The best thing about this process is that I will be able to salsa dance again! So thank you doctor Cashia for making my feet brand new.

I also appreciate your staff that always treats me like a movie star when I come in! I will recommend all my co-workers to you.

Sincerely,

Teala

Cashia
