Dear Dr. Cachia:

Thank you doesn't begin to express my gratitude for all you have done to repair my foot. You are a master at your craft! I now understand about my surgery being a team effort; you will do your part and then I must do mine. Your insistence about following recovery instructions has paid off and I now walk without pain. I also appreciate the time you took with me to make sure I was comfortable and understood everything that was being done. It is rare to find a physician who has such passion about his work and is willing to share it with his patients!

Sincerely,

Sheridan O'Brien
